

Shortt's Shorts on Young Living's Copaiba Essential Oil

***Copaiba is the liquid gold of
Essential Oils***

***Copaiba reacts to the CB2 receptors similar
to medical marijuana and is more
concentrated!***

Use Copaiba for tooth pain and teething

Use Copaiba to enhance other oils

Use Copaiba - reduce pain and inflammation

- *Copaiba contains up to 40% - 70% caryophyllene – medical marijuana contains 30% caryophyllene (affects the CB2 receptors – is the pain reliever of medical marijuana)*
- *Copaiba is gentle enough for teething babies*
- *Copaiba is an anti-inflammatory*
- *Layer Copaiba with other oils to increase their effect*
- *Copaiba assists in wound healing and prevents infection*

On a Personal Note:

I layered Copaiba with Pan Away for relief from an injured elbow.

I love being a Young Living Representative.
