

Shortt's Shorts on Young Living's Frankincense Essential Oil

Frankincense - the 'King of Oils'

Its healing powers has been valued by cultures for years.

It is one of the most studied essential oils in history.

Frankincense helps with:

- ***mental clarity and memory***
- ***increasing oxygenation to the brain***
- ***combating hard to heal brain injuries***
- ***natural anti depressant, mood booster***
- ***sun spots, acne, blemishes, scars***
- ***shingles, skin tags and warts***
- ***balancing hormones and combating PMS***
- ***contains sesquiterpenes – helps brain injuries***
- ***stimulates the limbic system of the brain***

On a Personal Note:

I use a drop of Frankincense and Lavender on my hands and rub under my arms after a shower for breast and lymph gland health.

I love being a Young Living Representative.
